

Laboratory and Diagnostic Study Policy and Consent

All laboratory analyses and diagnostic studies performed at/or arranged by any One to One Health facility will be reviewed by a medical provider. In all instances, it is your (the patients) responsibility to schedule a follow-up appointment so that the labs or diagnostic results can be discussed in person with a physician or medical provider.

Should the patient choose to see a non-One to One Health physician for review of their labs or study results, some type of communication will likely be initiated from the One to One Health staff (via email or phone) to confirm that appropriate follow-up has occurred. In the event, you have not been contacted by the One To One Health staff, do not assume that your results are normal. Please understand, we cannot guarantee abnormal results will be communicated to you unless you schedule a follow-up appointment to review the results.

Our goal is to achieve excellence in patient care. We ask that our patients assist us in this goal by scheduling a follow-up appointment at the time the labs or studies are performed and by keeping us informed about any relevant outside medical evaluations.

Signing below confirms that you have read and understood the One to One Health Laboratory and Diagnostic Study Policy. Signing below also indicated your full understanding that it is you (the patients) responsibility to assure that the medical follow-up occurs after every lab and diagnostic study performed or orchestrated through a One to One Health facility. You will be required to sign this consent form annually.
